

## ***C2 NerveMonitor Intraoperative Neuromonitoring***

### ***Applications***

- Thyroid Surgery
- Skull Base Surgery
- Facial Nerve Surgery
- Peripheral Nerve Surgery

## C2 NerveMonitor

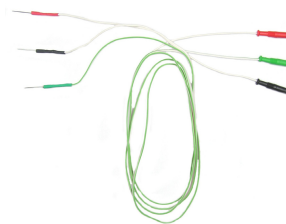

C2 NerveMonitor: Art.-No. 508240 (4 channel EMG) or 508280 (8 channel EMG) is a new generation nervemonitor. It is easy to use with buttons, switches and a clear display on a screen. C2 NerveMonitor is a high end device with intelligent features and it will define the new standard of easy-to-use equipment with a simplified user interface. The input procedure of patient data can be done automatically by using a bar code scanner. C2 NerveMonitor identifies all necessary patient data and does the complete setup of all parameters according to predefined programs. C2 NerveMonitor is available as four or eight channel EMG monitor with two independent stimulators. Designed for the daily use in the operating theatre, C2 NerveMonitor can be used securely after a short briefing.

- Very easy to use
- Precise presentation of EMG signal
- Clear audibility of EMG signal via powerful loudspeaker
- Adaptive auto mute function for stimulation
- Patient database for documentation
- Barcode scanner to read in patient data
- Wide range of disposable and reusable accessories
- Standard USB printer attachable

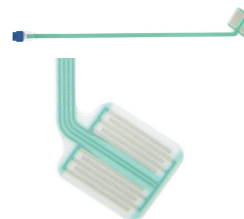

Art. No. 540 415 (2 channel)  
Art. No. 540 425 (4 channel)  
**EMG electrode minibox**  
with reference and ground,  
4x1.5 or 8x1.5mm touchproof  
connector DIN42802,  
cable 4m

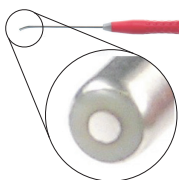

Art. No. 530 628 (10 pieces)  
**3 SDN electrodes**  
red/black/green, cable 1.2m  
• single use  
• ETO sterilised

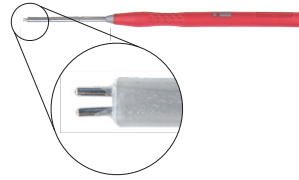

Art. No. 530 666 (10 pieces)  
**Disposable electrode for vocal muscle 15mm**  
bipolar, with neutral electrode,  
needle length 15mm,  
30° angled, round cable 1.5m,  
1.5mm touchproof connector  
red/black/green  
• single use  
• ETO sterilised

Art. No. 530 656 (10 pieces)  
**inomed laryngeal electrode**  
**for tube with diameter of 7.5-9mm**  
adhesive surface length = 32mm,  
width 37mm, with neutral  
adhesive electrode  
• single use  
• ETO sterilised

Art.-Nr. 522 603 (5 pieces)  
**BCS probe, L=4.5m**  
angled, bipolar concentric,  
for direct nerve stimulation,  
cable 3m, total length  
with handle 15.5cm  
• single use  
• ETO sterilised

Art.-Nr. 522 610 (10 pieces)  
**Microfork probe L=4.5cm**  
straight, bipolar,  
for direct nerve stimulation,  
cable 3m, total length with  
handle 15.5cm  
• single use  
• ETO sterilised

Certified in accordance with  
DIN EN ISO 13485 : 2003  
9001 : 2000
